"Distant Lover"

Visit "[Distant Lover](#)" on MotoLyrics.com

I always fantasize
Every time the night strikes eleven
Oh to feel the rhythm sway
To dance the night away would be heaven

Never never never had the chance boy
Never ever ever got to love
Tonight I'm free to explore your body
Never never never had the chance boy
Never ever ever got to love
Tonight I'm free to explore your body

Oh what a night, boy
Just keep the music pumping
All through the night, boy
You'll be my distant lover
I'm not here to fall in love
Tonight should be enough for us
Just move your body closer

Oh give it all to me
No boundaries, we are free
For the first time
Hold your body close to me
I'll be a memory by the sunrise

Never never never had the chance boy
Never ever ever got to love
Tonight I'm free to explore your body
Never never never had the chance boy
Never ever ever got to love
Tonight I'm free to explore your body

Oh what a night, boy
Just keep the music pumping
All through the night, boy
You'll be my distant lover
I'm not here to fall in love
Tonight should be enough for us
Just move your body closer

I know you want to see the light

And spend our days as one
Don't want forever, just want whatever
Until the rise of the sun

Oh what a night, boy
Just keep the music pumping
All through the night, boy
You'll be my distant lover
I'm not here to fall in love
Tonight should be enough for us
Just move your body closer

Oh what a night, boy
Just keep the music pumping
All through the night, boy
You'll be my distant lover
I'm not here to fall in love
Tonight should be enough for us
Just move your body closer
