She's the apprentice of the rocket man
It came to him in a dream
She's the apprentice of the rocket man
Cook and clean

Late at night
All drunk up in the street
Conversations with that blue moon
One day my love we meet

She's the apprentice of the rocket man
It came to him in a dream
She's the apprentice of the rocket man
Cook and clean

Some say he's a mad man
Who fell to his own defeat
Some say he's got no one
But the moon at his feet

She's the apprentice of the rocket man
It came to him in a dream
She's the apprentice of the rocket man
Cook and clean
