Written by: Edward Apphel

Don't you wanna fly along with me
Somewhere far away where the sunlight shines in
circles
Don't you wanna be so deep in love
And be loved in return I think it comes around in circles

Magic is the minute of your day
When you look at me and smile
You know it happens every time
Sadness is the face that you put on
When I'm not around
Why can't you think of me in circles

Chorus:
It goes around it comes around
It's where you want it to be
Sometimes you're lost sometimes you're found
It's an eternity why can't we make the circles go away
We can't make the circles go away

Now it's time to say what you will say
For better or for worse you got to know it all by heart
And as you're making up your mind
Remember what I said because I still believe in circles

Chorus:
It goes around it comes around
It's where you want it to be
Sometimes you're lost sometimes you're found
It's an eternity
We can't make the circles go away, no we can't make
the circles go away
