

## Ash Farizi "Look At The Sun"

Visit "[Look At The Sun](#)" on [MotoLyrics.com](https://MotoLyrics.com)

I know  
devastating  
I know  
Frustrating

You never know  
whatever is behind  
You never know  
That it can't be rewind

I know  
That the past hurts  
hard to let go  
harder to try

Move forward  
The best place to go  
Move forward  
You want some more

No matter what comes ahead in front of us  
We have to go forward it like against the dust  
We gonna show them who is the real live boss  
Let me tell you

Ever thought of something that is far away  
The only source that we get is the thingy's ray  
The need to know how it feels atleast in halfway  
Let me tell you to look at

The sun when it shines so bright  
How it waits for the night  
Giving out endless light  
No need no memory  
So as the melody  
Moving forward in me  
Look at the sun

I know  
Just let it flow  
Eventhough  
Its very raw

No matter how  
long it takes  
Just never try  
to make it fake

No matter what comes ahead in front of us  
We have to go forward it like against the dust  
We gonna show them who is the real live boss  
Let me tell you

Ever thought of something that is far away  
The only source that we get is the thingy's ray  
The need to know how it feels atleast in halfway  
Let me tell you to look at

The sun when it shines so bright  
How it waits for the night  
Giving out endless light  
No need no memory  
So as the melody  
Moving forward in me  
Look at the sun

The sun when it shines so bright  
How it waits for the night  
Giving out endless light  
No need no memory  
So as the melody  
Moving forward in me

The sun when it shines so bright  
How it waits for the night  
Giving out endless light  
No need no memory  
So as the melody  
Moving forward in me

The sun when it shines so bright  
How it waits for the night  
Giving out endless light  
No need no memory  
So as the melody  
Moving forward in me  
Look at the sun
