Thought she was the most important person in the
world
Dressed him up in chloroform he hasn't said a word
But he came round
Came, came round, hit the wall
She's got 15 ways to run around and make him cry
And he's got 15 ways to wander round and wonder why
I've got a feeling there are better people

Dragged him down the stairs into the back seat of her
car
Should have seen it coming, he was hazy, it was dark
But he broke out
Broke, broke out jumped the wall
And she's got 15 ways to run around and make him cry
And he's got 15 ways to wander round and wonder why
I've got a feeling there are better people
And she's got 15 ways to run around and track him
down
And he's got 15 ways to run around and try to hide
I've got a feeling there are better people

She killed them all
Well they're the ones that recognize
They're the ones that spit in your eye
But she drove right
Drove, drove right at the wall
And she's got 15 ways to run around and make him cry
And he's got 15 ways to wander round and wonder why
I've got a feeling there are better people
