This world is got me in its grip
Ain't no way I can wriggle out
Sometime such a crazy lady
Makes wanna scream and shout

Chorus:

This world is holding all the keys
Gotta break it before it breaks me
Something gotta happen soon
Something set us free from this world, this world, this world!

This world is got me on my knees,
There was a time when I used to stand tall

Dealers on the corner of every street
Driving so many easy way out
I ain't buying none of it
. what it's all about
For this world, this world, this world, this world

Chorus:

This world is holding all the keys
Gotta break it before it breaks me
Something gotta happen soon
Something set us free from this world, this world, this world
