Just try being lonely and you'll know just how I feel
I saw you with your new love and oh it hurt me so
Funny how I see your face everywhere I go
You smiled and looked to be so happy as you passed
by
So I stepped around the corner so you wouldn't see me
cry
Supposed you wanted someone the way I want you
Just imagine your body mind and soul breaking in two
Walk the floor each night shed tears you can't conceal
Just try being lonely and you'll know just how I feel
Just try being lonely and you'll know just how I feel
