Brainiac dumb dumbs bust the scientific
Survivor surviving the bullshit Iâ'm livin thru
Conditions is pitiful
Trying to find a better position is critical
It got me sitting Indian style, eyes closed in my living
room
Meditating,
Debating
With self hatred
My keep it real aspect got me feeling complacent
Stagnant, faceless
Face it
This track right here aâ'll be my facelift
And even when you face him
You still recognize that heâ's not what your base is
Iâ'm far from that basic shit
Itâ's premium platinum
Heâ's more than a rapper
Itâ's more than just cars and broads and plaques that
Iâ'm after
And after Iâ'm gone and my soul drifts
You can let your kidâ's kids get ahold of this
And say heâ's so sick
Iâ'm so sick
Itâ's like an epidemic plague spreading through a third
world country
Going through the struggle yet I live comfy
I understand the social ladder of having poverty be a
part of genetics,
Inherit
Being poor
Racial discrimination was always in play across the
board
It affected my fatherâ's father
Not my motherâ's father
Cause he was a part of
Group of West Indians who came from the islands to
the V
And you ask about me, and you ask about me
