C. Mead, A. Murphy

Well a long time ago when I left home I never thought I
would be
Part of a wheel in a cog on a belt that turned the big
machine
I wanted out on the road or down on the street or
something wild and free
But now I'm payin' the bills and movin' the country in
Nashville Tennessee

They promise you this they promise you that you never
know what to believe
All I want is to live the good life that someone promised
me
You try to be honest you try to be fair but the blame is
always on me
Cause I'm payin' the bills and movin' the country in
Nashville, Tennessee

Long black shadow reachin' way too far crampin'
everybody's style
Everybody here gets to be a star but when the lights go
out you're still on trial

No matter where I go or what I do it never seems good
enough
All I know is if it don't kill me it's gonna make me tough
Tryin' hard not to fall through the cracks and grease up
that machine
But I'm payin' the bills and movin' the country in
Nashville Tennessee
