01 - Scream

Now it's done, now it's through
The world hates me, I know
Now I'm out, now I'm done
They are staring at me I know
Sad and true without you
Feeling inside is cruel
Reflection, deflection
Picture inside is addle

Scream! Scream out my heart
Scream! scream it out tonight

Now it's gone, now it's true
Alone in the world, I know
Still I'm sad, still it feels bad
No one's waiting, I know
Sad but true without you
Good times in my mind
Oppression, affliction
Scene inside is getting better

[Solo: Kride]

02 - Fuck You

You know nothing about us
You think that we're not cool
You say we've got nothing to give
We just say: FUCK YOU!
We don't care about you thoughts
We will hate you anyway
You're just a piece of SHIT!
We take no shit from no-one

Fuck you! You're just a piece of shit!
Fuck you! We take no shit!

We take no shit from no-one

You can say whatever you dare
It's all the same cos we don't care

[Solo: Kride / Solo: Pete]

03 - Wasted Years (Clean Version)

Now it's too late to change the fate
To change the way, the time is out
Way too soon you had to go away
Why too soon you had to fly away?

The guilt, the pain burning like a flame
The pain we feel too bad, it's so real
Feelings of shame, ourselves we blame
Throughout the years speaking to deaf ears..

So many years waiting...
So many years now crying... for you

[Solo: Pete / Solo: Kride]
