Deeper I should look,
Deeper I will have to see
What lies there, what is real

Deep underneath, so far it's hard to see
On goes the fucking circus affecting you and me
The legacy remains year after year
Inheritance of sickness spreading out
Messengers of illness, everywhere I see
We are the ones, you and me

No one wants to see the truth we don't believe
No one wants to see the Antichrist in (you and) me
No one wants to see the truth we don't believe
No one wants to see the Antichrist in (you and) me

Deeper you should look,
Deeper you'll have to see
What lies there and what is real

Deep underneath, so far it's hard to see
On goes the fucking circus affecting you and me
The legacy remains year after year
Inheritance of sickness spreading out
Messengers of illness, everywhere I see
We are the ones, you and me

No one wants to see the truth we don't believe
No one wants to see the Antichrist in (you and) me
No one wants to see the truth we don't believe
No one wants to see the Antichrist in (you and) me

No one wants to see the truth we don't believe
My Antichrist, in you and me
