

## **Buffalocomotive "Making Friends"**

Visit "[Making Friends](#)" on MotoLyrics.com

I will construct a robot with care and spare part  
A metal soul machine to restart my heart

My friends are made of nothing but a handful of  
silicone  
Your friends are nothing but blood and skin and bone

No human feelings  
Well thatâ€™s alright by me  
If you stop breathing  
Just reconnect the circuitry

I have no need for your intelligent design  
With just a print of blue from Von Frankenstein

My friends are made of nothing but a handful of  
silicone  
Your friends are nothing but blood and skin and bone
