to all my astronauts this is a great day in history  
only thing that kept me goin was the faith that you were  
missin me  
astronaut stat is us some people disagree  
the future saw us comin and i think it saw victory  
or specifically i was in a slippery situation  
picture me dreaming while everybody's hatin  
got a hundred freddies chasin  
im just tryin to escape them  
and i woke up i was sleepin in my spaceship  
i just wish i could let you see every side of me  
if you could see inside of me i swear  
you'd lie to die with me  
shoot or hide with me  
crash or fly with me  
stay as high as two hundred and sixty six kites with me  
i just wish you woulda took this flight with me  
now i wish you could hear me
