Come on baby take a chance with me  
Don't change the channel like you're watching TV  
Turn up the volume I've got more to say  
I think if we could start conversing we'd be chatting all day  
And in the evening we could choose  
To roll a spliff, cook some dinner and kick off our shoes  
Step into night, we could live our delight  
Come together in a frenzy when the feeling's all right  
And in the morning I bet there would be  
Time for toast, another spliff, a cup of Rooibos Tea  
We've got the music and we've got the time  
We've got rhythm, we've got music, we've got Cape Town sunshine  
You're not the only...

Only one life to live  
Too many paths to choose  
I've got a bridge to burn (I must express this truth)  
It seems our time is through  
I wouldn't lie to you  
I want to go now (I must express this truth)  
But don't get so stressed with me  
You're not the only fish  
Who's swimming in my sea (I must express this truth)  
It's not like I care but I thought you'd understand

Another day I'd have more to say  
But playtime is over, I'll be on my way  
Another date we could stay up late  
Climb the roof, watch the stars intertwine our fates  
Under another Sun I would be the one  
But what do you know? Look at the time! Seems I've got to run.  
Cos there are things that I can't control  
See I'm a man with a plan that just doesn't involve you  
I get restless, there's a thought on my mind  
I'm no monogamous man, I am a creature of a different kind  
I'm on a trip, I must admit  
I've got my eyes on a prize

That makes love look like shit

And like they say this could easily be  
The last time that you get a chance to hear from me  
I gotta go on a spontaneous flow  
And where this road will end, well, I just don't know  
I get a grip, no emotional slips  
I want a tattoo on the side of my dick  
That says "Han Solo"

But I fear what I can't control  
And you're not the only...

Only one life to live  
Too many paths to choose  
I've got a bridge to burn (I must express this truth)  
It seems our time is through  
I wouldn't lie to you  
I want to go now (I must express this truth)  
But don't get so stressed with me  
You're not the only fish  
Who's swimming in my sea (I must express this truth)  
It's not like I care but I thought you'd understand

Come on baby take a chance with me  
Don't change the channel like you're watching TV
