"Only Us"

Barren heart, cross the border
All was lost, we fell under
Endless skies, bodies rising
Token smiles burn our faces

Moments form nights of wonder
Tender falls, pouring thunder
Careless tides pull us under
I can't fight, all is done for

Love me like the only one as all of the colors fall
Love it is the open flame, we burn like a constant fire
Love me like the only one and I'll run for cover
Only us
Love me like the only one

Hold it, keep this fire going, I don't feel I'm living
Knowing, in these open moments, holding out behind
you
Hold me, love me like the only, only one that feels this
I'll go, holding out beside you, holding on for

Love me till it falls, all that's now it's ending

Love me like the only one as all of the colors fall
Love it is the open flame, we burn like a constant fire
Love me like the only one and I'll run for cover
Only us
