I didn't sleep tonight
So what did I do?
Did I have a fight?
I mean for you

I'm so afraid to lose you,
All these words confuse you, darling

That night I went with you, my friend
And I'll keep going till the end
Your hand meets mine, we're out of time

Love factory, that's where she works
Take a look at all the girls and trains
Love factory helps when it hurts
Heals the pain but all the scars remain

Love factory, that's where she works
Take a look at all the girls and trains
Love factory helps when it hurts

Heals the pain but all the scars remain

Was it just a dream? It seems too real
I love it when you scream - that's what I feel

What a cruel illusion
In my mind confusion, darling
Yeah

Love factory, that's where she works
Take a look at all the girls and trains
Love factory helps when it hurts
Heals the pain but all the scars remain

Love factory, that's where she works
Take a look at all the girls and trains
Love factory helps when it hurts
Heals the pain but all the scars remain
