Charm Rock and Company "Simple Chemical"

Visit "Simple Chemical" on MotoLyrics.com

Infinitely big or infinitely small Girl, you're my guinie pig We're gonna have a ball

I like your science
You got good science girl
I love your energy
Your nature your biology
Make me wanna plant my tree

At what temperature
Will your heart catch fire for me?
At what temperature
Will your heart freeze?
See, your anatomy's
Like a drug to me

Go on, buy my seed Let me plant my tree

I like your science You got good science girl I love your energy Your nature your biology Make me wanna plant my tree

Well I like your Simple Chemical I like your Simple Chemical Well I like your Simple Chemical I like your Simple Chemical

I like your science You got good science girl I love your energy Your nature your biology Make me wanna plant my tree
