Verse 1:

On the path to success making sure that every stones
turned
Patiently waiting for my position like an intern
But every opportunity I go for
And I'm not a gopher know that going forward
Old prezzies my bills need canes
Money's the same, but pockets change
Friends come n go, enemies accumulate
Snakes all over the place
Look out for the wolves in sheep clothes
With a hawk or an eagle
They see that your getting green like your part of the
eco
Then they start getting greedy that's as far as we go
Striving to be on the top - I know it's a steep slope
Motivated even more, putting in my energy
I'm focused on the goal, David Beckham penalty
I'm guaranteed it'll be my time soon
Cuz I'm like goku when he's starring at the moon

Verse 2:

Family over friends and enemies intervene
Money I swear to god has never came in between, us
I feel like it's on me to rewrite (the game)
And for me to be the person to be like
A real role model, Condoleezza Rice
And they don't gotcha if you oughtta think twice
Nothings for free, pay the price
Even age is the fee you pay God for life
Working my ass off while I'm still young
So I can kick back and say look what I've become
Nobodies ever done it coming where I'm from
It's like one in a million ima be that one
I take notice to all of the little things (and I'm)
Playing the fool like a joker to a king
Nowadays it's not about proving what you can do
But it's about who you know, and who knows you!
