"Help Me"

Visit "[Help Me](#)" on MotoLyrics.com

Yeah this is my surrender flow, I'm November cold
Place your palm left on my chest, can you feel a heart
of gold?
When you look into my eyes, can you see your own
reflection?
Are you scared that this is perfect, trying to find my
imperfections?
See i been around the world, i feel at home inside you
Grip me like some handlebars and i might let you ride
too
I can help you to control those emotions up inside ya
I promise to be your Sampson, just don't do me like
Delilah
Puffin' on that sour
Thinking for a minute what we could do in an hour
I'm down for whatever wherever whenever, I'm the type
to let ya
You tell me my smile is cute, i use my teeth just to
undress ya
So come and come through, i'll send your body on a
trip as long as i can come too
It's me and you
I been sipping on this wine, smoking through this all
Don't turn the lights off dim and i welcome you to my
zone

Help me, Help me make
Make love to you
Teach me, Cause there's nothing
That i would not do
Help me, Screaming give me all you've got
(Welcome to my zone when i'm inside you i feel home)
Teach me, For you had me down, my god
Saying help me

Through them winter nights i can keep you warm
If i hit you like a lightning bolt, could you weather the
storm?
Please be warned i got sides i do not show maybe you'll
unveil
When we touch it helps me read you, love is blind you

my brail
Chest to chest, i can feel your heart beating next to
mine
What's the time?
I can feel the sun creeping through the blinds
You say you can't take the heat, love them things you
do with ice
I don't like a girl who doesn't, me i love a girl who tries
Tango takes two
I'll pay for that dinner if dessert is on you
Yeah you know i come to life when the moons out
She be biting like a carlin when i let my wolf out
Whenever you come through
I'll send your body on a trip as long as i can come too
It's me and you
I've been sipping on this wine, smoking through this all
Don't turn the lights off dim and i welcome you to my
zone

Help me, Help me make
Make love to you
Teach me, Cause there's nothing
That i would not do
Screaming give me all you've got
(Welcome to my zone when i'm inside you i feel home)
Teach me, For you had me down, my god
Saying help me

You know, the atmosphere is everything
You know music is like a feeling
Sometimes i wonder like how it feels

Help me, Help me make
Make love to you
Teach me, Cause there's nothing
That i would not do
Screaming give me all you've got
(Welcome to my zone when i'm inside you i feel home)
Teach me, For you had me down, my god
Saying help me
