Visit "[The Slide](#)" on MotoLyrics.com

I got you in my sights
and I intend to keep you there if that's alright
the cracks you've fallen through
the misteps in quick reps for you to do

I'm all in so fall back to yesterday
find just who you want to be
you came around and I pushed you cause I'm a wave
and you just go and slide away
go on your way

I still feel you in my soul
I tried to rid myself you just won't seem to go
tred soft through all the miles
just think of our things from time to time

I'm all in so fall back to yesterday
find just who you want to be
you came around and I pushed you cause I'm a wave
you just slide across my face
go slide away
