Close your eyes
Close your eyes tonight
Close your eyes
Close your eyes

Love me in starlight
Take me on the moon tonight
Show me what it feels like
If we'll be flying all night

Up in the sky
Flying so high
Far beyond the moon
Floating in time
Silver so bright
Mercury light
A galaxy of love
My baby and I
Don't let me go
Hold me you know
All I need is you
The way that you blow
Cristal and ice
Midnight sunrise
Baby can't you see
Just close your eyes

Close your eyes
Close your eyes tonight
Close your eyes
Close your eyes

Love me in starlight
Take me on the moon tonight
Show me what it feels like
If we'll be flying all night
[repeat]

Light years away
Stars on display
A halo in the night

Around Milky Way
Love is divine
Come baby shine
The universe is ours
Devotion, the sign
Hold me tonight
Venus inside
Energy invade
Planets collide
Together we rise
Infinite skies
Baby can't you see
Just close your eyes

Close your eyes
Close your eyes tonight

Love me in starlight
Take me on the moon tonight
Show me what it feels like
If we'll be flying all night
[repeat]

Close your eyes
Close your eyes tonight
Close your eyes
