Hey commander
It's your cadet
I'm only a rookie
And you're a vet
I've got this ship
It's kinda like my car

Hey commander
New to the game
It's called survival
What's my name
For this mission
Behind bars

Don't you know
It's getting kinda strange
Mars needs woman
Can that be arranged?
You best buckle up
Before you hit the roof
Mars needs woman
Needs woman too

Climb aboard with the speed of light
See the stars before it gets night
Hang on tight
The earth's gonna move

Hey commander
It's your cadet
I'm only trying
But not quite yet
I've got this cause
It's kinda seems so far

Don't you know
It's getting kinda strange
Mars needs woman
Can that be arranged?
You best buckle up
Before you hit the roof

Mars needs woman
Needs woman too

Don't you know
It's getting kinda strange
Mars needs woman
Can that be arranged?
You best buckle up
Before you hit the roof
Mars needs woman
Needs woman too

It's floating
It's floating
It's floating
It's floating
It's floating

It's floating
It's floating
It's floating
It's floating
