If i can't let this go

I'm telling you i won't make it another year

If i go all the way

I'm telling you i can see all these things coming clear

'cause we have so much love

But we need so much more

'cause we have so much love

But we need so much more

If we go on like this

I'm telling you we won't make it another year

But if we go all the way

I'm telling you we'll finally see all these roads coming  
clear

'cause we have so much love

But we need so much more

'cause we have so much love

But we need so much more

We have a fascination with the darkness

Although we're standing in light

We have the strongest sense of kindness

But still we can't treat our own selves right

We have so much love

But we need so much more  
We have so much love  
But we need so much more  
We go further  
We go further  
We go further  
We go further  
'cause we have so much love  
But we need so much more  
'cause we have so much love  
But we need so much more  
We have a fascination with the darkness  
Although we're standing in light  
We have the strongest sense of kindness  
But still we can't treat our own selves right  
We have so much love  
But we need so much more  
We have so much love  
But we need so much more  
We go further  
We go further  
We go further
