we Cris Cab in the stu stu put in work
come on ah

you know summer time is comin
time for some action
so i put upon the block said hello to a girl with a very
pretty accent
could be spanish or italian
she was raised in Manhattan
..Caribbean
she's got the smile and me back in
she's tryin keep a gurad up
but i'm tryin to get the guard down
she's been hurt so many times
she don't wanan take her chance now
i would gladly risk it all
climb mount everest knowing I might fall
hold my breath till I get to Mars
jump in front of a speeding car
anything you want girl
living in the young world
gotta put your back in
when everybody else is acting

girls are you ready

Chorus:

you gotta put in work
till your hands fall off
you gotta put in work
till the clock runs out
you know forty the days and forty the nighths
since we first started talking
when i tried to turn the lights off
she said you got to crawl before you start walking
you said patience is a virtue
i can't wait any longer
cause I've been sitting in your room tryin to get the

boom boom
and my feelings growing stronger
she's tryin keep the guard up
but i'm tryin to get the guard down
she's been hurt so many times
she don't wanan take a chance now
i would gladly risk it all
climb mount everest knowing I might fall
hold my breath till I get to Mars
jump in front of a speeding car
anything you want girl
living in the young world
gotta put your back in
when everybody else is acting

girls are you ready

Chorus:

you gotta put in work
till your hands fall off
you gotta put in work
till the clock runs out

ain't no hocus pocus, ain't no abracadabra
if you want that girl man
you got to go head and grab her
ain't no centuria
ain't no Ave Maria
i you want Maria gotta go and seek her

[2 x Chorus:]

tryin to think it's time
Cris Cab ladies on ..come on
