I wake up early in the morning to the sounds I hear  
outside  
Such a noise, I'm going crazy, I got to get out and  
find  
What I've always wanted in my whole life  
It's up to me and I won't let fate decide

Luck only takes you far enough, but not this time  
Luck only makes you feel like, La La La  
Luck only takes you, luck only makes you  
And I got nothing left to lose  
Before it breaks you down

And to all the friends that got lost in the biz  
May this song give you strength to find a way back  
Through the mist of the fame, oh what a taste  
Of another dream gone to waste

Luck only takes you far enough, but not this time  
Luck only makes you feel like, La La La  
Luck only takes you, luck only makes you  
And I got nothing left to lose  
Before it breaks you down

Listen closely to the sounds you hear outside  
Its time to get up you got to get out  
And make something of your life

Luck only takes you far enough, but not this time  
Luck only makes you feel like, La La La  
Luck only takes you, luck only makes you  
And I got nothing left to lose  
Before it breaks you down
