Drained head, the cycle is killing you  
Force-fed, blindly you suffer through  
Stand still so no one will notice  
With blind eyes like that  
Snakes just creep up your back

This is survival our demise  
This is extinction through modern eyes

Sit back, hold your eyes open wide  
Pitch black, they're coming in from all sides  
Play dead, you aren't the one feeding them  
That does not mean the fires don't burn

Show me where to sign  
Heavy are the thoughts  
When we try not to think them  
Stale go the words when they're said  
Cold is the heart that was dead from the start  
Born to die with no thoughts in our heads
