This is where the so-called "party" ends
Will you stand by me, my brethren of friends?
This is where we stand or where we fall
We are not alone our backs up on the wall

So here we are again dodging bullets
Waiting for the kill shot to take us away
So here we are again dodging bullets
Neo, you are fucking dead

This is where the so-called "party" starts
Out for fun with nought but vengeance in our hearts
This is where we will rise again
Born from all the mistakes we'll never make again

So here we are again dodging bullets
Waiting for the kill shot to take us away
So here we are again dodging bullets
Neo, you are fucking dead

Neo you were a fucking amateur

So here we are again dodging bullets
Waiting for the kill shot to take us away
So here we are again dodging bullets
Neo, you are fucking dead
