Started on the back foot and can't get up
Waited for the moment to live it up
Can't fast forward the tape is cut
Guess it's just me? Shit I fucked it up..

Mark you time with trite tirade
This is our time lets save the day
There's something in the fucking way (x 2)

This is where we live forever
You know this is true
Enlightening everything and no one
The mirror screams back at you

Started on the back foot and can't get up
Perfectly placed for the set up
Genius lingers by the door
Lucidity a part of the décor
And when I thought I'd got it right
Turns out I'm wrong all we got is spite
Stop living my life in half-time

Mark your time with trite tirade
Will you step up to save the day?
There's something in the fucking way (x2)

Started on the back foot and can't get up
Perfectly placed for the set up
Genius lingers by the door
Lucidity a part of the décor
And when I thought I'd got it right
Turns out I'm wrong all we got is spite
Stop living my life in half-time

The smarter that I think I am the dumber I get
