when the fear sits in  
when the fire burns  
where i found the place  
when theres no need to turn  
when the evening sings and errie song  
longging for the day. you say im wrong

you can find your palce  
but never fit in  
and when youve left  
do you where you been  
i can see the light  
but only when its gone  
you can go on waiting but only for so long[so long,  
song long]

chorus;  
i know where or right  
its not always clear  
because of never felt the fear  
cant say so good forever in time  
i've always felt the rhyme  
what happens when there no more rhyme

can we face our selve like we face its other  
we've never felt anything or our own  
i keep make much longer to feel any danger  
i hope where not living for a life time alone  
[repaet chorus}
