Visit "[It's Doomsday](#)" on MotoLyrics.com

Fall into dark water
These gray skies look farther
The fog is too dense to see through the way
Reach out and say goodbye
Our future's begun

The devil's tempting me
With memories of what I loved
Lies and deceit from up above
Year after year I watch you fade away
You fade away

A different escape
False memories
They betray

Free from the gallows
I'm tripping on shadows
Ghosts of the past sink into my dreams

Woah my dreams
And they're still haunting me
