Lord pick me up, Dust me off  
I've been running, but now I'm lost  
I don't wanna be with this misery,  
Make it go

Get me right, make me strong  
let it out, it's been too long  
I Don't wanna be with this misery  
Make it go

Take it out to the edge, and let it fall  
give it back I need her now, more than before  
if theres a way, my lord, please would you show me  
A prayer for the lonely

I cant believe, I cant forget,  
the hardest part, hasn't started yet  
I don't wanna be With this misery  
Make it go

Take it out to the edge, and let it fall  
give it back I need her now, more than before  
if theres a way, my lord, please would you show me  
A prayer for the lonely

A prayer for the lonely

Take it out to the edge, and let it fall  
give it back I need her now, more than before  
if theres a way, my lord, please would you show me  
A prayer for the lonely
