Verse 1

Oh, if you mean it, just like you meant it
Then please believe it, and don't try to mend it
Cus', cus' when the call comes, you'll be falling over
your time
And you'll try to run, but you'll find that your hands are
tied

Chorus

Just look around every corner
And we'll agree to stand in order
And when she comes with her sticks and her stones
We promise that we'll just ignore her
Just look right through every window
And take a last look and hope that you'll know
And when they come with their sticks and theirs stones
We promise that we'll let it all go

Verse 2

The ones you love so, let down gaurds and then they
show
The flaws they tried to hide so, you're the only one who
knows
Find then erase me, break all ties then maybe you'll be
So lost you'll need to believe
That it's freedom that you need

Chorus

Just look around every corner
And we'll agree to stand in order
And when she comes with her sticks and her stones
We promise that we'll just ignore her
Just look right through every window
And take a last look and hope that you'll know
And when they come with their sticks and theirs stones
We promise that we'll let it all go
We'll it all go
Let it all go

Middle 8

What can you do with the words that are true
If you don't wanna hear it
But it's been left to you

Chorus

Just look around every corner
And we'll agree to stand in order
And when she comes with her sticks and her stones
We promise that we'll just ignore her
Just look right through every window
And take a last look and hope that you'll know
And when they come with their sticks and theirs stones
We promise that we'll let it all go
We'll let it all go
Let it all go
We'll let it go
