Oh when I say to you, you've gotta make a choice  
Is it me or just the sound of my voice  
Just the sight of you can bring me up or down  
Taking hits finding food in our home town

You lied to me, I think you're full of shit now  
I don't believe a word, I have nothing else to say to you,  
I told you once to stay away...  
Stay away form me, stay away from me,  
Stay away from me

And when you're out I sleep, I'm creeping in my sleep  
The pounding door makes me worry who I meet  
Your crazy hair and your crazy mind  
I know your head is spinning all the time

[Chorus]

You talk to fast and you talk too much  
You bother me cause you say I'm not enough  
Your not the same you've changed for the worst  
So stay away cause I was here first
