She got up and made her coffee got ready for the office
Put her makeup on and prayed she wouldn't cry
He hid behind his paper he didn't want to face her
After all the stupid things they fought about last night
And all day long she wondered is it over
And all day long he said it just can't end this way
On his way home he stopped and bought some roses
And he practiced every word he had to say
For every day there is a night for every summer there's
a fall
For every rose there's a thorn upon the vine
I didn't mean to hurt you girl but even in a perfect world
A little rain has got to fall from time to time
But a few little teardrops ain't gonna wash away a love
as strong as yours and mine
Baby don't you know nothing ever grows where the sun
always shines
They sat down on the sofa he said baby please sit
closer
She reached out and took him by the hand
She said thank you for the flowers when a love's as
good as ours
Sometimes you have to trust what you don't
understand
For every day there is a night...
All night long they were all that mattered
All night long they were lovers they were friends
All night long the rain fell on the window
And they fell in love all over again
Baby don't you know nothing's gonna grow where the
sun always shines
Baby don't you know nothing's gonna grow where the
sun always shines
