I hate ignorance
People just ain't listening
I chose LSE cos of the syllabus
I spent time seeking God with dilligence
See I made a decision, don't belittle it
Is it jealousy?
What's the problem with LSE?
This is heresy,
Stop investing your energy,
In spreading lies, twisting and sending guys
A different direction, you best just listen and get it
right,
I declined Cambridge
Yeah, alright - face it
The decision was mine, yeah and I made it
I made a choice and that's not wrong
If you want to go, try
I'm just so creative,
I just wanna make hits
And there ain't no turning back
Now I just gotta make it,
I just gotta make it.

Chorus:

Burn all the fires tonight,
Burn all the fires tonight,
Burn all the fires tonight,
Burn all the fires tonight. (x4)

Look I'ma burn all the fires tonight
First I wanna thank Christ
He's the light of my life
He made sure I weren't blind, kept my eyes on the prize
I stay foccussed,
Never been enticed by the ice
While people like hype and are violent with knives
I'll take flight
Me and ein stein are kind of a like
And I don't know why people want my demise
I guess it's fine, cos my life will defy all the heights
I'm gonna fly

I'ma keep this brief, why front?
I've been tryna ease my grief and when my eyes shut
I can just see the streets are demise
But I'm assigned to bring the peace don't be surprised
cuz
With God's name in my heart
I don't lift weights but I'm raising the bar
Tryna pull strings I don't play no guitar
But you know we take aim for the stars

Chorus:

Burn all the fires tonight,
Burn all the fires tonight,
Burn all the fires tonight,
Burn all the fires tonight. (x4)

Sleep deprivation
I need medication
It's like I know what needs doing but keep hesitating
And I've been working for ages I've been very patient
I've been searching for greatness It seems I can taste it
So they label me a prodiggy
And Honestly
I've already said I'm an anomaly
Everything I do, I do it properly
There ain't no stopping me
People that are lazy are just odd to me
The media are watching me...
Huh no pressure,
Na I'm lying, believe me I know pressure
People keep making up lies it won't let up
But I just I get going you know I'm a go getter
With God's name in my heart
I don't lift weights but I'm raising the bar
And tryna pull strings I don't play no guitar
But you know we take aim for the stars
Rah

Chorus:

Burn all the fires tonight,
Burn all the fires tonight,
Burn all the fires tonight,
Burn all the fires tonight. (x4)
