What's the good of knowing it if you won't show
it
that you could help to change my mood
what's the good of knowing it if you won't show
it
that you could help me feel so good!
that you could help me feel so good!

Show me your smile, show me your goodness
and your laughter too
you pick me up when I am down
you take away my blues
you take away my blues

What the good of knowing it if you won't show it
that you could help to change my mood
what's the good of knowing it if you won't show
it
that you could help me feel so good!
that you could help me feel so good!

Show me some fun, show me some action
like running in the park, the sunny days seem
endless, whenever I'm with you

Don't hide all the wonderful things about you
all the wonderful things that I know are true
the good things that help me to change my mood

Show me blue skies and your warmth
and your kindness too the greatest time on this earth
is spending the time with a friend like you

What the good of knowing it if you won't show it
that you could help to change my mood
what's the good of knowing it if you won't show
it
that you could help me feel so good!
that you could help me feel so good!
