[Intro]

(Raining Night/Thunderbolts/Car Starts)

A: Ey manye stop drinking you are all fucked

F: No manye I can take it stop being so scary, I can hear a dark voices over a beat...

A: Shit dude how much have you drinking?, Now you seeing illusions and hearing stuff...

F: Give a beat and so I can drop something over it...

A: Ait manye,, here you go

[Chorus 2x]

I'm the beast, rocking the beat, killing the weak  
Sending my enemies to the never ending sleep  
It's H-Town baby, taking over the blocks  
We're on the top, firing the deadly shots

[Verse]

H-town in the house, spitting some pure fire  
Deadly rhymes, deadly flow, so leave the mic, retire  
Complicated lines from a corrupted mind  
Stumped to the motto, the world is mine  
Am not doing this for the cash or the fame in the game  
I just wane free my chest, mark down my name  
Wane be the special one, the lyrical son  
The gifted one, basically the chosen one  
The voice from the underworld, ready to shine  
Drop a line, commit a crime, let the world grind  
Delicate this song strictly for em that stays underground  
Let the speakers bounces, let 'em shake the ground

[Chorus 2x]

I'm the beast, rocking the beat, killing the weak  
Sending my enemies to the never ending sleep  
It's H-Town baby, taking over the blocks  
We're on the top, firing the deadly shots

[Verse]

Feeling like the mastermind, spitting a verse  
Killed you with the first, the second got you even worse  
As I enter the room, shining up as lamp,

Punching you up, moving around as a champ  
A true killer on the mic, got you hypnotized  
So now you realized that everything I said  
You got it memorized, stuck inside you head  
Biting off my shit, I guess you are brain head  
I mentally confused you with a couple of bars  
Verbally abuse you, so you see a couple of stars  
Physical damage you and leaving you with a couple of  
scars  
... So now you know, who we fucking are

[Chorus 2x]

I'm the beast, rocking the beat, killing the weak  
Sending my enemies to the never ending sleep  
It's H-Town baby, taking over the blocks  
We're on the top, firing the deadly shots

[Outro]

(Glass crash)

A: Ey manye get up, stop falling asleep you're soon  
home

F: uhhh wa uhhh wat... What's happening?

A: Nothing you fell asleep and start rapping about H-  
town, about your self and a lot of another things...

Damn manye it was straight fire... It's sad that you  
couldn't record it

F: Yea manye it's bad... but I'm sure that it'll come back  
another day so I can write it down...
