See the circles twilight, feel the sadness drowning me
I feel and see...
Touch my heart and hold tight,
Never let me fall into empty
I feel and see...
Never whisper goodbye,
Please come forward and embrace my soul
Don't fly away...
When daylight unites with darkness so real
The pain, the anguish, the struggle that I feared
For so ... long. Please let's keep it real!
We love - We hate - We trust our fate!
We are the Wlves who say to fuck it all.
So when we die, don't dare you cry
Remember that you won't find reasons... TO STAY
See the circles twilight - we are alone - we know
Never whisper goodbye - we are alone - we know
When daylight unites with darkness, we feel it coming
We all see eyes that are crying, yet hoping that we'll go
slow
Inside, cold and on ice, sliding down
You, please try to melt me down
Exploding angels, angels
Reloading anger, anger
We know our own salvation
Of souls, you know that we will try...
