I remember going down that road
Listening to the kind of music you loved
Wishing everything would go back to the way it was
Now you're gone and I've no place to fall
Just an empty space with nothing at all
Living everyday just hoping you would call again

Here we are, just running from our broken hearts
Will they beat again?

Chorus:

All this time, spent chasing lies
When all I need is someone to save my life
Fight or flight, it's too late to make this right
When all I need is someone to save my life

You're heart was open but it's what I said
And all that's left are words I never meant
Now you're here like a tattoo on my chest

Here I stand, just a lonely, broke down man
With nothing left

Chorus

Here and right now I'm letting it out
I finally found the words to say
Don't let me down 'cause I need you now
You won't be the one that got away
Here and right now I'm letting it out
I finally found the words to say
Don't let me down 'cause I need you now
Oh, you won't get away

Chorus
