Come with me IÂ'll take you to the ocean where we can
breathe
You and me together hand in hand just like it used to
be
The time of moon is right to scrutinise
Free me

We used to be the ones who never cared about the
others
Used to have another world, where nothing used to
matter
We had our wings and our broken little pills
Bottle after bottle fighting gravity to stop this spin

And I remember when we drove all night
To find another place another time
But you decided to be free from me
You choose reality
Reality instead of me

No donÂ't let me down
DonÂ't go, I wonÂ't be fine
How you canÂ't see
YouÂ're taking life from me
Lover donÂ't speak
You always disagree
When we canÂ't see
WeÂ're learning to believe
Believe in what we feel
So close your eyes
IÂ'll show you love tonight

ItÂ's started out so slowly drifting further from each
others
The violence every night and the silence screaming
murder
I tried to give you time to get used to my escape
Every body down I will intoxicate

And the piano full of blood
From the songs that IÂ've been bleeding

A bottle full of wine I am standing on the ceiling
Iâ€™m dancing here alone every night until you come
I just wanted to be holy but please just come back

Home, donâ€™t let me down
Donâ€™t go, I wonâ€™t be fine
How you canâ€™t see
Youâ€™re taking life from me
Lover donâ€™t speak
You always disagree
When we canâ€™t see
Weâ€™re learning to believe
Believe in what we feel
So close your eyes
Iâ€™ll show you love tonight

And I remember when we drove all night
To find another place another time
But you decided to be free from me
You choose reality
Reality instead of me

How you canâ€™t see
Youâ€™re taking life from me
Lover donâ€™t speak
You always disagree
When we canâ€™t see
Weâ€™re learning to believe
Believe in what we feel
So close your eyes
Iâ€™ll show you love tonight
Forever dies tonight
