

## October 31 "Behind The Castle Walls"

Visit "[Behind The Castle Walls](#)" on MotoLyrics.com

The time was known medieval  
When kings and queens did rule the land  
But there were two with insane minds  
And wickedness at hand  
For deep within their castle  
They sat and laughed while people died  
They never cared for anyone  
But others of their kind

For life we plead, real blood  
We bleed from the pain  
Rising up we knew we must  
Now stop these evil ones  
To break these chains and  
Make our claim for revolution

She was the queen of endless love  
And deemed the rich and classy whore  
She romanced many in her bed  
Amidst the sounds of war  
The king, the greedy tyrant spent  
All of his time watching poor men die  
And no one dared get in his way  
Or it would mean their lives

It is from our voice that we now demand  
Our freedom from your pain  
And we will fight and kill to bring justice  
Back to our people once again!  
There's no longer independence  
And without it we have no lives  
So together now we will stand  
And march and fight until you die

Kill! Let us stand and kill! Kill!  
Behind the castle walls

Our pride was in our freedom  
Which death would now reward  
As a certain magic filled the hearts  
Of our storming battle horde  
For we felt as if in heaven

As our tattered armor shined  
Yes, the poor were rising from their woes  
To save our broken lives

Kill! Let us stand and kill! Kill!  
Now we will attack!

Yes, the time had come for vengeance  
For angered were us slaves  
We had longed to storm the castle walls  
And finally end their reign, end their reign...

We rode the path unto the bridge  
That brought us to the gates  
For our quest for peace had now begun  
And death would lead the way, lead the way!

To the king and queen we now call  
For you and your people all the same  
We've suffered here now long enough  
It's time to end our pain!

As we slayed the guards in battle  
We knew that it was time  
For now beyond the castle walls  
Sat the king and queen to die  
And we brought our swords together  
And our pride we did defend  
As we beheaded all the wicked ones  
Who'd never reign again  
Yes, the chains were finally freed  
And there for all the town to see  
Were the heads of the king and queen  
We've found peace
