I'll grow up to fly star tonight til I fall  
Grow up to carve my niche outside you will see  
And I'll tempt all night I'll find ecstasy  
On an island I'll stay the land will let me down

So far no one would speak  
So far no one would speak  
Chemical shock

I'll grow up to fly high alright til I fall  
Grow up to swallow my own lies you will see  
When I've slept all night I'll find sympathy  
On an island I'll pray the sun sets me down

So far no one would speak  
Chemical shock  
So now spill in the street  
Chemically shot
