Chorus:

In lyrical debate I'm ah throw everything plus the
sink,
I'm a black atheist and there's more of us than
you think,
Whadja think? That I would just sit up and just let you
cheat?
Never as long as there's a be a single breath in me.

I'm ah,

Keep attacking, every religious faction, every single
section
If I didn't mention yours. Every missed rapture,
every single infection
If I fail to mention yours then you'll get it next thing.

Greydon Verse:

Check it! They want to shut me up,
Wrap, shackle, and collar me,
I try to dumb it down but,
They won't even follow me.

That Scientology, them embrace other mythologies,
Like Joseph Smith, Zeus, the tooth fairy and Bartleby,

They try to threaten me,
Say I would get it the worse,
Even be cursed by characters,
From View Askewniverse,

Fuck you complaining for?
You think you living in hell?
When Muslim chicks can't ever wear pants,
Without going to jail?

Hell yeah, religions the problem,
That's why I stay on the topic,
That's why they wanna stop me

Like I'm assaulting their prophet,

Hate mail used to read,
They were gonna kill me and such.
Now they read,
I don't talk about other religions enough.

Chorus:

In lyrical debate I'm ah throw everything plus the
sink,
I'm a black atheist and there's more of us than
you think,
Whadja think? That I would just sit up and just let you
cheat?
Never as long as there's a be a single breath in me.

I'm ah,

Keep attacking every religious faction, every single
section
If I didn't mention yours. Every missed rapture,
every single infection
If I fail to mention yours then you'll get it next then

Noob Verse:

God damn that I am,
Religion's a corporate scam,
No voting for Uncle Sam,
Enslaved with praying hands
The birth of the straw man,
Whose part of his proclam,
Fight tribal with family clans,
Use rifles to conquer lands,

Ourself is bought amassed in
Mass graves and abort disaster,
Kill gays in courtless pastures,
Enraging self-conscious rappers,
Engage in Helter Skelter,
The rays from the sun will meld them,
Past days I was feeling helpless,
I prayed for the god to selfish,
To escape from my mental prison,
Make days for cataclysm,
Instating the global system,
Embracing the earth collision,
Extinction level event,
From comets that's heaven sent
Atomic malevolence,

Trick knowledge from presidents.

Instead of studying evidence,
Pursuing benevolence,
Galactic alliances,
With secular scientists
Wonder astronomies,
Exploring the bottomless
Ignored by the populace
Off course with the apocalypse

Chorus:

In lyrical debate I'm ah throw everything plus the
sink,
I'm a black atheist and there's more of us than
you think,
Whadja think? That I would just sit up and just let you
cheat?
Never as long as there's a be a single breath in me.

I'm ah,

Keep attacking, every religious faction, every single
section
If I didn't mention yours. Every missed rapture,
every single infection
If I fail to mention yours then you'll get it next then

Greydone Verse:

Another form of population control,
The very idea and nature
Of somebody needing to save us is old
Religiosity is taking its toll,
You don't even challenge the old
World views they placed in your skull?!
That's why I got you beat,
With a whole array of common functions,
You're weak. You think you need,
A god to accomplish something.

Another classic case of codependence
If he's all that you say that he is
He probably negates his own existence

They exterminated him
He's in a form of Raids
Former slaves still serving the gods
Of former slaves.

I fight for the freedom of strangers
When I blurt lines
I ain't m chill on the mic?
Like power of sixes first prime?

I ain't ve been constantly evolving
Since the first line,
You can do one thing,
I can invert mine,

I dare your god to show up,
To damn my blasphemy.
I bet I have more questions for his ass,
Then he ain't ll have for me.

Chorus (2X):

In lyrical debate I ain't m ah throw everything plus the
sink,
I ain't m a black atheist and there ain't s more of us then
you think,
Whadja think? That I would just sit up and just let you
cheat?
Never as long as there ain't s a be a single breath in me.

I ain't m ah

Keep attacking, every religious faction, Every single
section
If I didn't mention yours. Every missed rapture,
every single infection
If I fail to mention yours then you ain't ll get it next then.
