"Dance"

Good morning silence
The reason to be expected
Warning signs I was blinded and unprotected
And now I close my eyes
I start to dance, and now I realize

X4

Dance the war is over

The window shatter
Love is all the matters
Tripping point of bullet-sound, hear the blooddrop on
the ground
And now I close my eyes
I start to dance, and now I realize

X4

Dance the war is over

(Ooooooh)

She's really gone
Memories keep remaining
She stole my heart and took my soul
There's no way to weigh it

X5

Dance the war is over
