Untruths and lies you told me before
Nothing you say could ever end this war, the hurting
never stops you look in my eyes and promised me true,
nothing you say ever comes through

Chorus:

But you know that I could be someone who could never
leave cause being free I just not meant for me
someday I will come to see all of this reality it's just not
meant it's just not meant for me

If you knew just how I feel, then maybe you can start
acting more for real some things never change all
these thoughts just run right through girl I just don't
know what do

Chorus:

Well if you knew just how I feel please understand that
it's for real then maybe you could tell me why I need
you so but you know that everything I did was out of
love for you I can't hold on for to long
