Every night I, I lay inside my bed and dream
I wonder if I ever meant anything
And to your love, I know that you hurt me so bad and I
But I will try

Chorus:

But still I try, I try
But I, I wont succeed
Cause everyday away from you, is one away from me
And I'd give my life, if I had to say goodbye
But still I try

I'm watching, I'm waiting
I'm wondering what's your move
What is and I'll be, what you wanted me to
And if I closed my eyes would I
See you smiling back at me
But I will try

Chorus:

And if I dream again, maybe I'll pretend
That you listen, I'm missin'
All this time with or without you
And if you walked away, my skies turning gray
And I know you, I show you
I tried it all, and now it is for real
And now it is for real
