As mountains caved in natives struggled to win,
but no one would lift a finger
as water dried up, the fever caught up
and no one would lift a finger

CHORUS

How can you try to live with yourself?
How can you get by without any help?
How do we spend each each day
alone?

As planets decay, people struggle to stay,
still no one would lift a finger
perhaps someone will, save the day, I prayed
still no one would lift a finger

CHORUS

She wandered the streets with her afflictions
only accompanied by convictions
Now there's nothing left of shelbi's shadow
If only she had the right conclusion
she was truly an illusion
now there's nothing left of shelbi's shadow
now there's nothing left...
no there's nothing left...

CHORUS
