[Chorus]

I am loosing myself to find you  
I am loosing myself to find you  
I am loosing myself to find you  
Yeah I'm dying, it's true  
Never been about anything more or anything less  
It's all about you,  
Like I'm loosing a war that I can't win  
But I can't loose because I'll loose you

I'm realizing the definition of life and the line  
Between truth and lies  
So in the end I be lying where the truth lies  
I'm a dog off the leash they want me euthanized  
Told me I'm not too far away well I ain't too surprised  
Looking down at the world like who the hell am I?  
Chocolate thoughts it's all I'm wondering, vanilla sky  
Waiting for my words to be heard, to be televised  
It's the worst I'm impatient, I get the urge, go crazy  
And run the game just for exercise  
Fuck the fame cause all the pain that I've gained on my  
way here  
Is been left behind  
So I'ma give you what I got not what I got to give  
The worst part if being alive is only not to live

[Chorus]

I am loosing myself to find you  
I am loosing myself to find you  
I am loosing myself to find you  
Yeah I'm dying, it's true

It goes, breaking down the weed, heading to the  
money  
Got an outta pocket speed, yes, true indeed  
In the newest meeks, doing interviews  
Bout how I moved about the street and how I started  
make beats  
I mean great stone, Jordan short song, sipping  
christyle,  
Man that shit's wild

Telling pilo we gonn be good till he say the same thang  
However you wanna put it, I put on a whole gang  
I put hbk every song, they ain't take it serious  
They say here we go, on your stereo  
World spinning, it go round and round, like a merry go  
Barely know, but I swear to god I'ma deal em hot as  
hell  
I'm a criminal stacking money to the ceiling but  
Feelings niggas fake, I'm past go, feeling like I'm great  
Bitch I need millions on my plate like

[Chorus]

I am loosing myself to find you  
I am loosing myself to find you  
I am loosing myself to find you  
Yeah I'm dying, it's true  
It's true, it's true, it's true.
