If you ever been in love
And you know just what I'm talking about
Expect when you really know you finally find the person
u want
And you wanna spend rest of your life

I thought I been there before
But now that I'm sure, finally I find somebody who
cares
I giving my heart and my soul to her
Now just want to hole world to know

You are the reason that I breath
I want you to know that
If you wanna leave, then I couldn't go back
My life will be incomplete without you here

You're the reason that I breath
Ladies if you got a man
Fellas if you got a girl
Why don't you tell em that they mean the hole world...
to you... you you you
Tell em you the reason that I breath

The felling you get when you call n they don't answer
N you feel like you're whole world is about to stop
And you can't believe somehow, somebody makes you
feel this way
I'm talking about
You can't eat
You can't sleep
You can't think at all
Then like a apart missing in your life
Why don't you look em in the eyes
And tell them that you are the reason why that I breath

I want you to know that
If you wanna leave then I couldn't go back
My life will be incomplete without you here
You're the reason that I breath
Ladies if you got a man

Fellas if you got a girl
Why don't you tell em that they mean the hole world...
to you... you you you
Tell em you the reason that I breath

I was broken before I meet you
Now I'm not stressing like I use to
And I gotta say
That you make my life much better

I can't barely breath
I can't barely breath

You're the reason that I breath
I want you to know that
If you wanna leave then I couldn't go back
My life will be incomplete without you here
You're the reason that I breath
Ladies if you got a man
Fellas if you got a girl
Why don't you tell em that they mean the whole world...
to you... you you you
Tell em you the reason that I breath
