We're wrapped in paper and it starts to burn  
The tissue melts and the stomach turns  
We come alive with our second skin  
And we'll die just to feed our sins  
Come alive

Ignore the laws  
We protect ourselves  
Behind this mask there is someone else  
Making room for neon cages  
I'm running blank for empty pages

Come alive  
I can feel you too

I invite you to the land of my mind  
Type command press starts and rewind  
Gravity will give you a rain-check  
Enjoy my frost  
Conceive my snow

Come alive  
I can feel you too  
Come alive
